

AFFORDABLE STRUCTURES MEDICAL BUILDING SOLUTIONS

ACCELERATED CONSTRUCTION PROVIDES ALTERNATIVE TO STICK-BUILT CONSTRUCTION

PROJECT PROFILE

- ❖ Country Doctor - Medical Clinic
- ❖ Ocala, Florida
- ❖ 5,040 Square Feet
- ❖ Custom designed medical offices and administrative space
- ❖ Building contains waiting area, exam rooms, x-ray suite and doctors offices

352-742-7488
813-630-4222

CHALLENGE

Due to a severe shortage of out-patient clinic space at a nearby hospital, the community needed an upscale medical facility that matched decor of the surrounding architecture. The project also had to meet the requirements and approvals of the doctors and offer a time saving alternative to stick-built construction.

SOLUTION

Because modular building technology utilizes concurrent construction processes, the site preparation was performed simultaneously while the building modules were being constructed. This process allowed the clinic to be fully functional in approximately one-half the time of standard construction.

FEATURING

- STANDING SEAM SITE BUILT ROOF WITH CUPOLA
- COVERED PORCH WITH CEILING FANS
- PERMANENT FOUNDATION WITH CRAWL SPACE
- COLONIAL WINDOWS WITH DECORATIVE SHUTTERS
- SPLIT SYSTEM AIR CONDITIONING
